4. Read the following passage and answer the questions that follow.

### **The World famous Pashmina Shawls**

It is believed that a pashmina shawl is as warm as 6 sweaters! It is very thin yet very warm. The goats from which the soft pashmina wool is collected are found at very high altitudes of 5000 metres. In winter, temperature here drops below  $0^{\circ}\text{C}$  (down to  $-40^{\circ}\text{C}$ ). A coat of warm hair grows on the goat's body which protects it from extreme cold. The goats shed some of their hair in summer. This hair is so fine that six of these would be as thick as one hair of yours !

The fine hair cannot be woven on machines and so weavers of Kashmir make these shawls by hand. This is a long difficult process. After almost 250 hours of weaving one plain pashmina shawl is made. Imagine how long it would take to make a shawl with embroidery.

- (i) What is so special about pashmina shawls?

-----

- (ii) From which animal is the wool for pashmina shawl obtained? Where are these animals found?

-----

- (iii) What is the speciality of Pashmina wools?
